# SQL Assessment Test 2 Questions and Expected Results

Keep in mind there is usually more than one way to answer these questions.

These questions start off with the basics and then get continually more difficult.

- 1. How can you retrieve all the information from the cd.facilities table?
  - Expected Result should look similar to this (with more rows):

#### **Answer 1:**

**SELECT\*** 

FROM cd.facilities

2. You want to print out a list of all of the facilities and their cost to members. How would you retrieve a list of only facility names and costs?

|   | Dat | a Output Explain                | Messa   | ages         | Notific       | ations |
|---|-----|---------------------------------|---------|--------------|---------------|--------|
|   | 4   | name<br>character varying (100) | <u></u> | memb<br>nume | ercost<br>ric | •      |
|   | 1   | Tennis Court 1                  |         |              |               | 5      |
|   | 2   | Tennis Court 2                  |         |              |               | 5      |
| 1 | 3   | Badminton Court                 |         |              |               | 0      |
| J | 4   | Table Tennis                    |         |              |               | 0      |

#### Answer 2:

SELECT name, membercost

FROM cd.facilities

- 3. How can you produce a list of facilities that charge a fee to members?
  - Expected Results should have just 5 rows:

| Dat | ta Output Expla       | ain Messages Notification    | ons                   |                      |                          |                            |  |
|-----|-----------------------|------------------------------|-----------------------|----------------------|--------------------------|----------------------------|--|
| 4   | facid<br>[PK] integer | name character varying (100) | membercost<br>numeric | guestcost<br>numeric | initialoutlay<br>numeric | monthlymaintenance numeric |  |
| 1   | 0                     | Tennis Court 1               | 5                     | 25                   | 10000                    | 200                        |  |
| 2   | 1                     | Tennis Court 2               | 5                     | 25                   | 8000                     | 200                        |  |
| 3   | 4                     | Massage Room 1               | 35                    | 80                   | 4000                     | 3000                       |  |
| 4   | 5                     | Massage Room 2               | 35                    | 80                   | 4000                     | 3000                       |  |
| 5   | 6                     | Squash Court                 | 3.5                   | 17.5                 | 5000                     | 80                         |  |
|     |                       |                              |                       |                      |                          |                            |  |

#### Answer 3:

select \*

from cd.facilities

where membercost != 0

- 4. How can you produce a list of facilities that charge a fee to members, and that fee is less than 1/50th of the monthly maintenance cost? Return the facid, facility name, member cost, and monthly maintenance of the facilities in question.
  - Result is just two rows:

| Dat | a Output I                   | Expla | in Messages Notific             | atio | ons                   |   |                               |   |
|-----|------------------------------|-------|---------------------------------|------|-----------------------|---|-------------------------------|---|
| 4   | <b>facid</b><br>[PK] integer |       | name<br>character varying (100) |      | membercost<br>numeric | * | monthlymaintenance<br>numeric | • |
| 1   |                              | 4     | Massage Room 1                  |      | 3                     | 5 | 3000                          | ) |
| 2   |                              | 5     | Massage Room 2                  |      | 3                     | 5 | 3000                          | ) |
|     |                              |       |                                 |      |                       |   |                               |   |

# Answer 4:

select facid, name, membercost, monthlymaintenance

from cd.facilities

where membercost != 0

and membercost < monthlymaintenance/50

- 5. How can you produce a list of all facilities with the word 'Tennis' in their name?
  - Expected Result is 3 rows

| Dat | ta Output Ex          | xpla     | in Messages Notification     | ons                   |                      |                          |                               |   |
|-----|-----------------------|----------|------------------------------|-----------------------|----------------------|--------------------------|-------------------------------|---|
| 4   | facid<br>[PK] integer | <b>G</b> | name character varying (100) | membercost<br>numeric | guestcost<br>numeric | initialoutlay<br>numeric | monthlymaintenance<br>numeric | P |
| 1   |                       | 0        | Tennis Court 1               | 5                     | 25                   | 10000                    | 20                            | 0 |
| 2   |                       | 1        | Tennis Court 2               | 5                     | 25                   | 8000                     | 20                            | 0 |
| 3   |                       | 3        | Table Tennis                 | 0                     | 5                    | 320                      | 10                            | 0 |
|     |                       |          |                              |                       |                      |                          |                               |   |

#### Answer 5:

select \*
from cd.facilities
where name like '%Tennis%'

- 6. How can you retrieve the details of facilities with ID 1 and 5? Try to do it without using the OR operator.
  - Expected Result is 2 rows

| Da | ta Output                    | Expla | ain Messages Notification    | ons                   |                      |                          |                            |
|----|------------------------------|-------|------------------------------|-----------------------|----------------------|--------------------------|----------------------------|
|    | <b>facid</b><br>[PK] integer | Ø,    | name character varying (100) | membercost<br>numeric | guestcost<br>numeric | initialoutlay<br>numeric | monthlymaintenance numeric |
| 1  |                              | 1     | Tennis Court 2               | 5                     | 25                   | 8000                     | 200                        |
| 2  |                              | 5     | Massage Room 2               | 35                    | 80                   | 4000                     | 3000                       |
|    |                              |       |                              |                       |                      |                          |                            |

### Answer 6:

select \*

from cd.facilities

where facid in (1,5)

- 7. How can you produce a list of members who joined after the start of September 2012? Return the memid, surname, firstname, and joindate of the members in question.
  - Expected Result is 10 rows (not all are shown below)

| _ | memid<br>[PK] integer | surname character varying (200) | firstname character varying (200) | joindate<br>timestamp without time zone |
|---|-----------------------|---------------------------------|-----------------------------------|---|
| 1 | 24                    | Sarwin                          | Ramnaresh                         | 2012-09-01 08:44:42                     |
| 2 | 26                    | Jones                           | Douglas                           | 2012-09-02 18:43:05                     |
| 3 | 27                    | Rumney                          | Henrietta                         | 2012-09-05 08:42:35                     |
| 4 | 28                    | Farrell                         | David                             | 2012-09-15 08:22:05                     |
| 5 | 29                    | Worthington-Smyth               | Henry                             | 2012-09-17 12:27:15                     |
| 6 | 30                    | Purview                         | Millicent                         | 2012-09-18 19:04:01                     |
| 7 | 33                    | Tupperware                      | Hyacinth                          | 2012-09-18 19:32:05                     |
| 8 | 35                    | Hunt                            | John                              | 2012-09-19 11:32:45                     |

#### Answer 7:

select memid, surname, firstname, joindate

from cd.members

where joindate >= '2012-09-01'

- 8. How can you produce an ordered list of the first 10 surnames in the members table? The list must not contain duplicates.
  - Expected Result should be 10 rows if you include GUEST as a last name

#### **Answer 8:**

select distinct(surname)

from cd.members

order by surname asc

limit 10

- 9. You'd like to get the signup date of your last member. How can you retrieve this information?
  - Expected Result
  - 2012-09-26 18:08:45

#### Answer 9:

select joindate

from cd.members

order by joindate desc

limit 1

- 10. Produce a count of the number of facilities that have a cost to guests of 10 or more.
  - Expected Result
  - 6

#### Answer 10:

select count(\*)

from cd.facilities

where guestcost >= 10

- 11. Produce a list of the total number of slots booked per facility in the month of September 2012. Produce an output table consisting of facility id and slots, sorted by the number of slots.
  - Expected Result is 9 rows

| 4 | facid<br>integer | Total Slots bigint  □ |
|---|------------------|-----------------------|
| 1 | 5                | 122                   |
| 2 | 3                | 422                   |
| 3 | 7                | 426                   |
| 4 | 8                | 471                   |
| 5 | 6                | 540                   |
| 6 | 2                | 570                   |
| 7 | 1                | 588                   |
| 8 | 0                | 591                   |
| 9 | 4                | 648                   |

# **Answer 11:**

select facid, sum(slots) as "Slots" from cd.bookings where starttime between '2012-09-01' and '2012-10-01' group by facid order by sum(slots)

- 12. Produce a list of facilities with more than 1000 slots booked. Produce an output table consisting of facility id and total slots, sorted by facility id.
  - Expected Result is 5 rows

|     | 4 | facid<br>integer | total_slots<br>bigint |  |
|-----|---|------------------|-----------------------|--|
| 1   |   | 0                | 1320                  |  |
| 2   |   | 1                | 1278                  |  |
| 1 3 |   | 2                | 1209                  |  |
| 4   |   | 4                | 1404                  |  |
| 5   |   | 6                | 1104                  |  |
|     |   |                  |                       |  |

#### Answer 12:

select facid, sum(slots) as "Slots"

from cd.bookings

group by facid having sum(slots) > 1000

order by facid

13. How can you produce a list of the start times for bookings for tennis courts, for the date '2012-09-21'? Return a list of start time and facility name pairings, ordered by the time.

# • Expected Result is 12 rows

| 4  | start timestamp without time zone | name character varying (100)  □ |
|----|-----------------------------------|---------------------------------|
| 1  | 2012-09-21 08:00:00               | Tennis Court 1                  |
| 2  | 2012-09-21 08:00:00               | Tennis Court 2                  |
| 3  | 2012-09-21 09:30:00               | Tennis Court 1                  |
| 4  | 2012-09-21 10:00:00               | Tennis Court 2                  |
| 5  | 2012-09-21 11:30:00               | Tennis Court 2                  |
| 6  | 2012-09-21 12:00:00               | Tennis Court 1                  |
| 7  | 2012-09-21 13:30:00               | Tennis Court 1                  |
| 8  | 2012-09-21 14:00:00               | Tennis Court 2                  |
| 9  | 2012-09-21 15:30:00               | Tennis Court 1                  |
| 10 | 2012-09-21 16:00:00               | Tennis Court 2                  |
| 11 | 2012-09-21 17:00:00               | Tennis Court 1                  |
| 12 | 2012-09-21 18:00:00               | Tennis Court 2                  |

#### Answer 13:

select b.starttime, name

from cd.bookings as b

inner join cd.facilities as f

on b.facid = f.facid

where b.starttime between '2012-09-21' and '2012-09-22'

and f.name like 'Tennis Court%'

order by b.starttime

- 14. How can you produce a list of the start times for bookings by members named 'David Farrell'?
  - Expected result is 34 rows of timestamps

#### Answer 14:

select starttime

from cd.bookings as b

inner join cd.members as m

on b.memid = m.memid

where m.firstname = 'David'

and m.surname = 'Farrell'
